COMPUTER TERMS TO KNOW

Below is a list to help familiarize you with basic terms that you may have heard “everybody” use and had no idea what they meant.

Here we go:

PC: Your computer! This stands for personal computer.

Boot: To start up your computer. If your computer is already on, reboot means to restart it.

Reboot: This means to restart your computer. Often programs will ask you to reboot after you install them (Windows Updates is a good example of this).

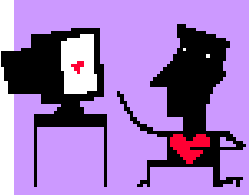

Desktop: Like the top of your desk, the desktop on your computer is the part of the screen that contains folders, icons, etc. There can be folders, icons, documents, and you can arrange them any way you like, or even toss them out, since there is a Recycle Bin.

Download: When you download something, you are transferring data from another computer to your computer, usually over the internet. You are going to receive the data.

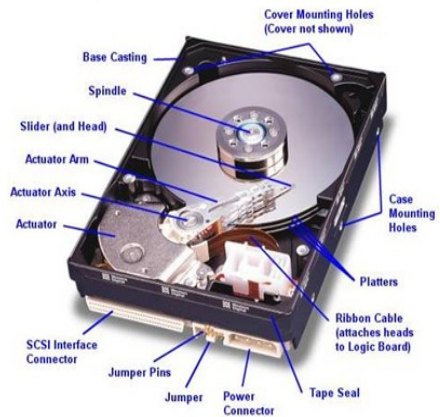

Upload: When you going to upload something, you are going to transfer it from your computer to someone else’s, usually over the internet. You are going to give it to someone else.

Font: A font is the style and size of lettering. For instance, if you want to compose a letter that looks like it has been written in calligraphy, you might want to use a font like Monotype Corsiva, instead of the one I have been using here, which is called Arial.

Hard Drive: Simply put, a hard drive is where all of your files, pictures, videos, programs, etc. are stored. There are different sizes of hard drives, depending on how much stuff you want to have on your computer. For example, if you are a video editor, you need a very large hard drive (videos can be very big files). If you only use your computer for the internet and to do your taxes, you don't need a very big hard drive. When you hear about people "losing their hard drive" it means that they have lost all of the data that was stored on their computer.

Hardware: Hardware is all of the physical stuff of your computer, like your mouse, your keyboard, your monitor, your printer, your stereo speakers, etc.

Software: On the other hand, runs as the non-tangible part of a computer. Your anti-virus program is software. Data, files, images, and videos are all examples of software. You need both software and hardware for a computer and its parts to run.

Modem : This one is a device that connects you to the Internet. It is usually a telephone cord for dial-up or a cable cord for DSL. DSL stands for Digital Signals Line.

Icon: An icon on your computer screen is a very small image that represents an object or program that you have on your computer. Some examples of icons:

Link: When you click on <http://www.cntcomputers.com>, you have clicked on a link. A link is the address of wherever you want to go. Sometimes the link can be to a file, an image, or a video as well as a website.

Operating System or O/S: Simply put, an operating system (or O/S) is the main program (software) that manages the hardware and software of the computer which allows you to use it. Current operating systems include Windows 95, Windows 98, Windows XP, Linux, Windows Vista, and the new Windows 7.

Search Engine: Sometimes when you ask someone about something particular they will tell you to “Google” it. What they are telling you is to go look it up on a search engine (in this case, it’s Google). A search engine is a program that searches for documents with information based on the criteria it is given and returns the results. There are many search engines you can use, such as Yahoo, AskJeeves, or Altavista. If you want a list of search engines, you can go “Google” one!

The Monitor :This is the device that looks like a TV. It shows pictures and text on its screen.

Processor: This is a small electronic device that interprets and carries out the instructions you tell your computer to do.

Memory or RAM (Random-access memory): is a form of computer data storage. Today, it takes the form of integrated circuits that allow stored data to be accessed in any order. "Random" refers to the idea that any piece of data can be returned in a constant time, regardless of its physical location and whether or not it is related to the previous piece of data.

Browser: A browser is a program that you use to “browse” or “surf” the web. If you sit down at your computer and you get on the internet, you are using a browser. You cannot visit anything on the internet without a browser. Some examples of current browsers are Internet Explorer, Firefox, Opera, Google Chrome, and the latest, Avant.

Computer Crash: Basically, a "computer crash" occurs whenever a program (one that's either an application you've installed on your PC or one that's part of your operating system) is unable to perform its regular operations. A crash happens when the program just completely stops performing its intended function, along with failing to respond to other parts of the system as well.

So there you have it; a list of defined basic computer terms. Now when it seems like “everybody” knows this stuff, you can rest assured that you really do.

February Special

Intel Core I3 3.3GHz Processor

4Gb RAM

1 TB Hard Drive

On Board Video

24xDVD+/-RW Drive

10/100/1000 Network Card,

**Integrated Sound and Stereo Speakers
with Subwoofer**

15-in-1 Card Reader

Micro-Tower Case

104-Key Keyboard and Optical Scroll Mouse

6 USB Ports (Two Front Side—Four Back)

20" LCD Monitor

Microsoft Windows 7 Home Premium 64-Bit

One Year Manufacturer's Warranty

ONLY \$749

\$629 without Monitor

UPGRADE OPTIONS:

- **Microsoft Office Home/Student 2010** add \$ 159.00
- **Add a Hewlett Packard D110A Printer/Scanner/Copier (Wireless)** add \$ 119.00

Love Lenovo

Lenovo G570 Laptop
Intel Core i3 2.2GHz Processor
4Gb DDR2 RAM
500Gb Hard Drive
DVD/RW Drive
10/100 Network Card, 56K Modem and WIFI B/G
One Express Card Slot, 3 USB
Sound and Speakers; 1.3 MP Webcam
4-in-1 Card Reader
15.6" color Display
Microsoft Windows 7 Home Premium
One Year Manufacturer's Warranty

\$629

OPTIONS:

- **Add a Carrying Case** add \$ 35.00
- **Add an external USB 3.5" Floppy Drive** add \$ 39.00
- **Microsoft Office Home/Student 2010** add \$159.00

NOTE: Prices good while supplies last.

Windows 7 Business PC

Intel Pentium Dual Core 2.6 GHz Processor

4Gb RAM

500Gb Hard Drive

On Board Video

22xDVD+/-RW Drive

10/100/1000 Network Card,

Integrated Sound and Stereo Speakers

Micro-Tower Case

104-Key Keyboard and Optical Scroll Mouse

6 USB Ports (Two Front Side—Four Back)

20" LCD Monitor

Microsoft Windows 7 Pro

One Year Manufacturer's Warranty

ONLY \$699

OPTIONS:

- **Add a Carrying Case** add \$ 35.00
- **Add an external USB 3.5" Floppy Drive** add \$ 39.00
- **Microsoft Office Home/Student 2010** add \$159.00

Windows 7 Pro Laptop

**Lenovo ThinkPad Edge E520 0319-26U
Notebook PC
Intel Core i3-2310M 2.4GHz
4GB DDR3
500GB HDD
DVD+/-RW Drive
10/100/1000 Network Card and Wireless N
3 USB and 1 HDMI Port
15.6" Display
Windows 7 Professional 64-bit
One Year Manufacturer's Warranty**

ONLY \$699

CNT Celina

**918 N. Main Street
Celina, OH 45822**

419-586-9906

CNT Van Wert

**1189 Westwood Drive
Van Wert, OH 45891**

419-238-9728

CNT St. Marys

**1198 Indiana Ave.
St. Marys, Ohio 45885**
